Dummy

Release v.0.1

Jose Angel

Nov 29, 2021

Table of Contents

1 Documentation for module 1

2 Documentation for testing 3

Python Module Index 5

Index 7

Documentation for module

src.utils.**function** (*x*, *y*)

function real function of two variables x and y :arg x: first variable :arg y: second variable :return: value of the function (-1 if error is present)

src.utils.**rosembrock** (*x*, *y*, *a*, *b*)

rosembrock real function of two variables x and y Rosenbrock :arg x: first variable :arg y: second variable :arg a: second variable :arg b: second variable :return: value of the function

src.main.**main** ( )

main

This function execute all the code

Documentation for testing

class test.test.**TestFunction** (*methodName='runTest'*)

TestFunction

Class for unit testing

test_list ( )

test_list Test that it can work with a list

test_output ( )

test_output Test that the function provide the correct result

- genindex
- modindex
- search

s

src, XX
    src.main, 1
    src.utils, 1

t

test
    test.test, 3

F

function() (in module src.utils), 1

M

main() (in module src.main), 1
module
    src, 1
    src.main, 1, 1
    src.utils, 1, 1
    test.test, 3, 3

R

rosembrock() (in module src.utils), 1

S

src
    module, 1
src.main
    module, 1, 1
src.utils
    module, 1, 1

T

test.test
    module, 3, 3
test_list() (test.test.TestFunction method), 3
test_output() (test.test.TestFunction method), 3
TestFunction (class in test.test), 3
